PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4.5 years of experience specializing in the MERN stack and AI integrations to build scalable, enterprise-level applications. Demonstrated expertise in architecting high-performance backend systems, developing generative AI microservices, and implementing Python-based automation frameworks at Amazon. Adept at driving operational efficiency, transforming complex workflows into automated solutions, and delivering robust full-stack applications that optimize business processes.

TECHNICAL SKILLS

EXPERIENCE

Amazon

Software Engineer

Aug 2021 – Nov 2025

- Accomplished a massive reduction in manual processing time, measured by a decrease from 480 minutes down to just 30 minutes per cycle, by engineering and distributing standalone Python automation applications (.exe) to business users.
- Accomplished significant operational cost savings, measured by an estimated \$10k in recovered administrative and engineering hours, by automating redundant enterprise workflows using advanced Python scripting.
- Accomplished highly efficient reporting pipelines, measured by accelerated data retrieval and analysis for leadership reviews, by writing optimized SQL queries and managing advanced Excel aggregations.
- Accomplished cross-functional technical alignment, measured by the rapid adoption of automated tools by internal stakeholders, by designing comprehensive technical presentations and system documentation.

TECHNICAL PROJECTS

OmniiIntel – AI-Powered Enterprise SaaS

Tech Stack: MongoDB, Express.js, React.js, Node.js, OpenAI API, Docker

- Accomplished robust automated content generation, measured by seamless enterprise user adoption, by architecting a highly scalable MERN SaaS platform integrated directly with OpenAI LLMs.
- Accomplished sub-second response times for complex AI text-generation, measured by API latency metrics, by optimizing database queries and implementing efficient RESTful APIs via Node.js microservices.
- Accomplished secure and reliable platform scaling, measured by zero-downtime releases, by implementing CI/CD pipelines and JWT-based authentication.

DataStream Pro – Real-Time Analytics Platform

Tech Stack: React.js, Node.js, Python Microservices, PostgreSQL, MongoDB

- Accomplished high-volume data processing, measured by real-time throughput stability, by utilizing Node.js for the main API gateway and Python microservices for intensive data aggregation tasks.
- Accomplished maximized database read/write performance, measured by optimized query speeds, by engineering a dual-database architecture leveraging MongoDB for unstructured logs and PostgreSQL for transactional data.
- Accomplished enhanced operational visibility, measured by high user engagement, by designing an interactive frontend dashboard using React Hooks to render complex data visualizations.

FlowState – Automated Workflow Management Tool

Tech Stack: React (Hooks/Context), Node.js, Express.js, REST APIs, GitHub Actions

- Accomplished streamlined business operations, measured by a reduction in manual data entry, by building a comprehensive web tool that acts as an automated proxy to synchronize data via third-party API integrations.
- Accomplished seamless asynchronous user experiences, measured by application rendering speeds, by utilizing advanced state management in React to handle complex, multi-step inputs.
- Accomplished exceptional code reliability, measured by a high test-pass rate, by establishing strict CI/CD workflows and performing comprehensive API endpoint testing.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, SQL
- **Frontend:** React.js, React Hooks, Context API, HTML5/CSS3, Responsive UI
- **Backend:** Node.js, Express.js, RESTful APIs, Microservices, Python (FastAPI/Flask)
- **AI/Data:** Generative AI, OpenAI APIs, LLMs, Prompt Engineering, Data Engineering
- **Databases:** MongoDB, PostgreSQL, Database Optimization, Schema Design
- **Tools/DevOps:** Git, Docker, CI/CD, GitHub Actions, AWS (EC2, S3), Automation

EDUCATION

B.Tech. in Electronics & Telecommunication Engineering

Bharati Vidyapeeth University, Pune
